Life is too short to not know how to run your own gear. Why do AM broadcasters  
run 50kW and not splatter?

Galen, KF0YJ

To: info-hams@ucsd.edu

I would be grateful to hear from anyone who has modified a Storno 5114, as featured in the November issue of Ham Radio Today. I purchased mine from GWR Radio, and it was previously used for data, so has no mic or speaker, and the power cable is missing. If anyone could help with where these should be connected I would like to hear from you.

Please reply to me directly rather than via the list.

Iain.
